

your chandelier

HOW TO CONSTRUCT THE CHANDELIER

- Your chandelier consists of 6 panels and 3 connecting discs.
- Begin with the first chandelier panel

ATTACH THE 3 CONNECTING DISCS AS FOLLOWS:

- Insert the slot of the 1st disc into the top slot on the straight edge of the chandelier panel.
(The disc will be horizontal to the vertical panel edge)
- Insert the 2nd disc into the middle slot .
- Insert the 3rd disc into the lower slot.

You will now have 1 chandelier panel with 3 connecting discs attached.

(Optional - you can use a drop of glue at each join to secure)

- Add the next panel in, starting at the top connecting disc and work your way down until it is joined to all 3 discs.
- Repeat with the remaining panels until the chandelier is complete.

Your chandelier can stand on a flat surface.

Alternatively you can prick a hole at the top of 2 opposite panels and thread cotton through to create a hanging chandelier.

Well Done!
